How to run the program

Open the voice recognition interface if you want to experience this. There is a start button at the bottom of the screen. You will have 4 seconds to speak what you want to do if you click the start button. After the ai successfully recognized your command, the ai will tell you what it's doing.

If you want to open the Notepad, what you say should include “记事本”.

If you want to open the Word, what you say should include “word”.

If you want to play music, what you say should include “音乐”.

If you want to increase the volume, what you say should include “增大音量”.

If you want to decrease the volume, what you say should include “减小音量”.

If you want to get a screenshot, what you say should include “截屏”.

If you want to search something on the web, what you say should include “搜索”.

If you want to search something in your computer, what you say should include “寻找”.

If you want to chat with the robot, you can just talk with it.
